

THE BEAUTY OF NEW ENGLAND FOR THE FLOORS OF AMERICA

Hard Maple

Hardwood Flooring Fact Sheet

Green River Lumber has built its reputation on consistent quality and careful grading of its flooring products. At Green River it's quality first!

We hope this fact sheet will give you an introduction to our products. Please call us with questions or comments.

Green River Maple is distinguished by its whiteness and superior uniformity of color. Our grading of maple exceeds most standards. We use only Northern Hard Maple lumber, some of the most sought after maple lumber on world markets. There simply is no substitute.

First Grade Maple is an all white sapwood product making a naturally light colored and durable floor. No brown heartwood is allowed. There may be an occasional small mineral streak. Lengths range from 11" to 7', averaging approximately 3.00'.

Select Maple has a light overall appearance. It contains both white sapwood and light brown heartwood. No more than 45% of any piece may be light brown. Limited, small character marks are allowed. Lengths range from 11" to 7', averaging approximately 2.50'.

Natural Maple is a lively character product; Natural maple shows the full appearance of the specie. Coloration ranges from white sapwood to brown heartwood including occasional streaks. Character marks reveal information about the life of a tree. Many of us who work with wood prefer the visually interesting appearance of Natural grades. An occasional hole of less than 1/2" in diameter may need to be filled. Lengths range from 11" to 7', averaging approximately 2.25'.

NOTE: Flooring that is less than 11" is in addition to the net square footage of the bundles. These pieces are included for filler only.

Red Birch

Hardwood Flooring Fact Sheet

Green River Lumber has built its reputation on consistent quality and careful grading of its flooring products. At Green River it's quality first!

We hope this fact sheet will give you an introduction to our products. Please call us with questions or comments.

Green River Red Birch is noted for its natural luster, satin-like appearance, and its durability, creating a truly distinctive floor. Red Birch features a reddish-brown coloration and often contains figured grain patterns. We are careful to purchase our lumber sorted for the red heartwood to assure consistency in its coloration.

Clear Red Birch is graded for clear red heartwood. While there will be some natural color variations, the darker and lighter toned pieces are graded out to maintain uniformity. This product is practically free from sapwood and imperfections; there may be an occasional small streak or other natural characteristic. Lengths range from 11" to 7', averaging approximately 3.00'.

Boston Red Birch (com & btr) contains natural color variations between lighter toned sapwood and rich, reddish-brown heartwood. Including sound knots, streaks and color variations. An occasional hole of less than 1/2" in diameter may need to be filled. Lengths range from 11" to 7', averaging approximately 2.25'.

NOTE: Flooring that is less than 11" is in addition to the net square footage of the bundles. These pieces are included for filler only.

GREEN RIVER SPECIFICATIONS:

Widths: 2 1/4", 3", 4", 5"

Sold by actual square foot, add 5% waste factor

American Cherry

Hardwood Flooring Fact Sheet

Green River Lumber has built its reputation on consistent quality and careful grading of its flooring products. At Green River it's quality first!

We hope this fact sheet will give you an introduction to our products. Please call us with questions or comments.

Green River American Cherry is famous for its luxurious, rich, red heartwood. It has been prized by generations for its inherent beauty, needing no embellishment. The lumber we use comes from Pennsylvania and Southern New York, the world's most renowned Cherry producing areas.

Clear Cherry is sorted for rich, red heartwood, and contains minimal sapwood (less than 5%). We keep the color as uniform as possible by grading out the lighter and darker toned pieces. Lengths range from 11" to 7', averaging approximately 3.00'.

Common & Better Cherry contains all of the natural coloration and characteristics of this specie, including sound knots, streaks and color variations. Character marks reveal information about the life of a tree. Many of us who work with wood prefer the visually interesting appearance of Natural grades. An occasional hole of less than ½" in diameter may need to be filled. Lengths range from 11" to 7', averaging approximately 2.25'.

Green River is proud to offer FSC Certified Cherry flooring.

NOTE: Flooring that is less than 11" is in addition to the net square footage of the bundles. These pieces are included for filler only.

GREEN RIVER SPECIFICATIONS:

Widths: 2 ¼", 3", 4", 5"

Sold by actual square foot, add 5% waste factor

Packaged in 7' nested bundles

Bundle sizes:

2 ¼" 15 SF/bundle, 54 bundles/pallet, 810 SF/pallet

3" 20 SF/bundle, 40 bundles/pallet, 800 SF/pallet

4" 18 SF/bundle, 45 bundles/pallet, 810 SF/pallet

5" 17 SF/bundle, 48 bundles/pallet, 816 SF/pallet

Hickory

Hardwood Flooring Fact Sheet

Green River Lumber has built its reputation on consistent quality and careful grading of its flooring products. At Green River it's quality first!

We hope this fact sheet will give you an introduction to our products. Please call us with questions or comments.

Green River Hickory is known for its appealing appearance and strong, bold grain patterns. These bold qualities set Green River Hickory apart from other hardwoods, combining durability and beauty.

Select and Better Hickory is a very high grade product that includes the range of colors inherent to the species. Some pieces will be 100% sapwood in varying shades of white; some pieces will be 100% heartwood in varying shades of brown; and some pieces will show white and brown in the same board. An occasional mineral streak may be present. These striking contrasting colors and strong grain patterns combine to make a very attractive floor. Lengths range from 11" to 7', averaging approximately 3.00'.

Natural Hickory includes the full range of colors inherent in the species, some pieces will be 100% sapwood in varying shades of white; some pieces will be 100% heartwood in varying shades of brown; and some pieces will show white and brown in the same board. In addition, this grade will show an array of sound character marks that may include tight knots, mineral streaks, and sapwood discoloration. Character marks reveal information about the life of a tree. Many of us who work with wood prefer the visually interesting appearance of Natural grades. An occasional hole of less than 1/2" in diameter may need to be filled. Please note: this grade is sold on an accumulation basis which may effect lead time. Lengths range from 11" to 7', averaging approximately 2.25'.

NOTE: Flooring that is less than 11" is in addition to the net square footage of the bundles. These pieces are included for filler only.

Yellow Birch

Hardwood Flooring Fact Sheet

Green River Lumber has built its reputation on consistent quality and careful grading of its flooring products. At Green River it's quality first!

We hope this fact sheet will give you an introduction to our products. Please call us with questions or comments.

Green River Birch answers the demand from our customers for a Northern Birch product with the Green River name on it. This richly colored flooring line is truly a distinctive product only found at Green River. Green River Birch is noted for its distinctive coloration, natural luster, satin-like appearance, and its durability.

Berkshire Birch is a Select and Better grade that contains the full blend of coloration found in Northern Birch, from creamy white sapwood to warm yellows to rich red heartwood. This combination creates a truly distinctive floor whose appearance is often enhanced by figured grain patterns and other natural characteristics. Tight, small (less than ¼") pin knots, burls and streaks enhance the appearance of Green River Berkshire Birch. Lengths range from 11" to 7', averaging approximately 3.00'.

Sheffield Birch is a lively character product that shows the full appearance of this specie. Coloration ranges from rich, dark red heartwood to light red tones to warm yellows and creamy white sapwood. Green River Sheffield Birch will include all of the natural characteristics of this specie, including sound knots, streaks and color variations. An occasional hole of less than ½" in diameter may need to be filled. Please note: this grade is sold on an accumulation basis which may effect lead time. Lengths range from 11" to 7', averaging approximately 2.25'.

NOTE: Flooring that is less than 11" is in addition to the net square footage of the bundles. These pieces are included for filler only.
